TensorFlow Lab

Labs

Work through the tutorials at your own pace:

https://www.tensorflow.org/get_started/get_started (don't read part about tf.contrib.learn)
https://www.tensorflow.org/get_started/mnist/beginners

Don't just read the code, try to run it simultaneously in the notebook/editor as you go through the text.

Two task to solve:
- exc1.ipynb - some introductory exercises
- mnist_tf.py - train your model on MNIST dataset
- summary_example.py - simple summary/tensorboard example, instructions in mnist_tf.py
